A LA-ICP-MS and SHRIMP U/Pb age constraint on the timing of REE mineralisation associated with Bushveld granites, South Africa
I.S. Buick, C. Lana and C. Gregory ................................................................. 1-14

The principal geological features of the Mooihoek Platiniferous Dunite pipe, eastern limb of the Bushveld Complex, and similarities with replaced Merensky Reef at the Amandelbult Mine, South Africa
R.N. Scoon and A.A. Mitchell ................................................................. 15-40

Geochemistry of regionally metamorphosed sedimentary rocks from the lower Benue rift, Nigeria: implications for provenance and tectonic setting of the Benue rift sedimentary suite
S.C. Obiora and S.N. Charan ................................................................. 41-56

Geochemical and mineralogical constraints on the genesis of the Otjosondu ferromanganese deposit, Namibia: hydrothermal exhalative versus hydrogenetic (including snowball-Earth) origins
A.R. Cabral, J.M. Moore, B.S. Mapani, M. Koubouva and C.-D. Sattler ................................................................. 57-76

Detection and monitoring of surface subsidence associated with mining activities in the Witbank Coalfields, South Africa, using differential radar interferometry
J. Engelbrecht, M.R. Inggs and G. Makusha ................................................................. 77-94

Discussion on: Reconstruction of the Ordovician Pakhuis ice sheet, South Africa by H.J. Blignault and J.N. Theron
C.D. Rowe and N.R. Backeberg ................................................................. 95-102

H.J. Blignault and J.N. Theron ................................................................. 103-104
